

# ANNOUNCING OUR INNOVATIVE RISK MANAGEMENT INFORMATION SYSTEM

*Poms & Associates Insurance Brokers has introduced a revolutionary new Risk Management Information System that changes the way public entities manage their risks.*

The **Poms Risk Organizer (PRO)**, Loss Control Survey & Abatement System, launched early 2011, enables Poms' clients to browse the results of risk management surveys and safety inspections through an innovative online interface. Organizations may collect and sort risk management recommendations across multiple sites, areas, and regions. PRO can be used by any type of organization, including school districts, risk retention pools, and various public and private industries.

PRO is a database of risk exposures identified in self-inspections and surveys, including Poms' flagship risk control service, the Loss Control & Safety Audit. The Loss Control & Safety Audit is a comprehensive inventory of an organization's risk exposures, ranging from physical site features, to emergency preparedness and Civil Rights. PRO enables administrators to analyze and manage dozens and even hundreds of risk management actions and sort them according to their relative urgency or assigned area of responsibility. Administrators may now extract important information from surveys about risk financing, facilities planning, and budgeting, while maintenance directors are able to quickly analyze and respond to items identified as deferred maintenance or in need of repairs. PRO also includes a unique behavioral observation feature that pinpoints risky employee practices that enables Risk Managers to shape employee safety training and counseling programs to provide maximum effectiveness.

PRO has been in use internally for nearly two years by the Poms & Associates Risk Services Staff. A wide array of valuable statistics have been collected from all throughout California for a variety of uses including the development of targeted loss control programs, support for grant applications, federal research projects, and other purposes. PRO is changing the way organizations approach risk management, allowing administrators to align risk management efforts with their individual organizational goals.

**For more information about PRO and how it can work for you, call us at 1.800.578.8802 or email [info@pomsassoc.com](mailto:info@pomsassoc.com)**
