The Insurance You Need, The Service You Deserve

At the core of our agency is our Commercial Insurance Brokerage operations. This uniquely talented and experienced team of professionals is dedicated to providing every Poms client with innovative solutions to their business insurance needs. We not only provide consultative advice to the risk management issues facing you, we deliver "real-world" solutions to your risks in the marketplace.

Poms provides clients with complete access to an impressive range of insurance carriers and products for all insurance needs. We are well versed in all property and casualty insurance products, including workers' compensation, professional liability, and executive protection coverages.

Knowledge and Experience as Specialized as Your Industry

We are adept at providing thorough service to clients in many diverse industries, including technology, manufacturing, public entity, educational institutions, construction/contracting, food service and retail.

In particular, we provide specialized focus and expertise to companies in the dietary supplement/nutraceutical and retail hardware/home center industries. We have staffed specially trained teams to support this highly focused client base and its unusually exacting requirements.

The More We Know, the Better You Sleep

How does Poms & Associates evaluate your risks? We start with a comprehensive review and analysis by our experienced and knowledgeable team. Only after thorough examination can we begin to understand not only your firm and its operations, but also any issues you face that may “keep you up at night.”

We are particularly proud of our Client Service Group – outstanding individuals with a broad background in our industry, from Fortune 500 brokerage and insurance companies to those firms that have more regional or local focus.

Our team is supported and strengthened by over a dozen loss control and safety consultants who identify and, when possible, engineer out inherent risks of your particular business. Whether negotiating with regulatory bodies such as OSHA or conducting ergonomics evaluations to reduce loss frequency, our risk control efforts enable us to engage underwriters proactively. This provides you with the ability to retain a portion of your risk should marketplace conditions not be receptive.

Ultimately, we propose cost-effective solutions for retaining and transferring risk that address each of your firm’s unique operations and exposures.

One Dedicated Team for All Your Needs

Still another advantage of partnering with Poms & Associates is that the same team of individuals who design, negotiate, and implement your business insurance plan are also responsible for managing your daily service needs. From certificates of insurance and policy maintenance with insurers, to claims advocacy and every service in-between, our dedicated team is accountable to you. This creates an invaluable sense of ownership by our team that you will no doubt experience and celebrate throughout the term of our business partnership.
